Project Name	BlogNest - AI-Powered Blog Management Backend
Maximum Marks	-

A customer problem statement captures the customer's point of view so the solution can focus on what matters to them.

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A content creator managing multiple blogs (Priya)	Organize drafts, categories and tags, and schedule and publish posts	I cannot keep track of many drafts and have no visibility into post performance	There is no centralized system for content workflow and engagement analytics	Overwhelmed and unproductive
PS-2	An editor or admin	Review, approve and moderate posts and comments quickly	Approval and comment moderation take too much time and there are no clear permission tiers	The workflow is manual and roles are not enforced	Frustrated and unable to control quality
PS-3	An author	Write high-quality blog posts quickly and attach media	Writing from scratch is slow and media handling is unstructured	There is no AI assistance or streamlined media metadata system	Stuck and short on time
